Abstract (en)

The device has a support foot (1) placed on a plane base structure (4), and a post (7) that extends from the foot along a direction (X7) perpendicular to the structure when the foot is supported on the structure. The post extends above a wire mesh and has gorges (8) gripping a conduit or a duct (140). An end (9) of the post opposite to the foot receives and maintains an orifice of a detachable complementary unit in position.
