Abstract (en)

[origin: EP1647496A1] The package has a flexible tubular sleeve (2) adhered inside a body of the package. An open end of the sleeve is closed by a flexible tape (12) fixed on an inner side of a flap (9). An end of the tape is integrated with a stripping tab (14) laterally projecting from the flap. The tab is detached from the tape to separate the tape from the flap by exerting a lateral traction on the tab. An independent claim is also included for a utilization of a package for transporting hospital wastes.
