Abstract (en)  
A container comprises a container body (1) with a deposit opening, a lid (3) for closing off and, alternatively, exposing said opening as well as an electric control for moving the lid (3) between a closed position and an open position. The electrical control has an electric motor (14), transmission (19-25,30-33), power source (15) and control means (16). The electric motor (14) is mounted in the lid (3) such that it is well protected from dirt.
