Abstract (en)
[origin: EP1647514A1] The inclined lift for persons has a gondola (1) pivot-connected to a drive unit (2) and guided on a running rail (10). A guide element is movably installed in the running rail and has a drive pinion which is connected to a drive motor and which positively engages in a coupling device which is a wire cable upon which are attached driving elements. The wire cable is rigidly connected to the running rail at defined intervals and the toothing of the drive pinion forms a positive locking connection with the driving elements.
