Abstract (en)

Front-loading clothes washing or drying machine comprising an outer casing, a worktop delimiting said outer casing at the top, a facia or control panel arranged on the upper front portion of said outer casing, in which said worktop and said control panel delimitate each other along respective edges that define a juncture, under which there are arranged gutter-like means having an upward open convexity facing said juncture extending thereabove, said gutter-like means extending in turn substantially over the whole length of said juncture. Said gutter-like means are provided as a unitary piece, i.e. integral with said worktop or, alternatively, as a unitary piece, i.e. integral with said control panel, or they may be provided by suitably forming an internal upper front crosspiece of the machine into a corresponding shape.
