Abstract (en)

The device has a flange (17) comprising sides (19, 20) forming support faces for upper horizontal rails (7) of filling units (5) and a contact surface (21) with a vertical post (3). A flange (18) surrounds the post and comprises of frontal extensions (24) engaging in open grooves (14) of the rails. The flanges are locked using a clamping screw (28) in order to simultaneously block the post and the rails between the flanges.
