Abstract (en)
Skirting board (10) comprising at least a support (12) able to be attached to a wall (16), and a covering (13) able to be coupled with the support (12) by the interposition of an intermediate element (14). The support (12) comprises a base plate (15) and at least a first guide (18), rectilinear and perpendicular to the base plate (15), and is provided with first attachment elements able to couple in snap-in manner with second attachment elements made on the intermediate element (14), so that the intermediate element (14) is free to slide along the first guide (18), maintaining itself parallel to the base plate (15). The covering (13) comprises a substantially rectilinear groove (26) parallel to the base plate (15) and able to couple with pads (31) of the intermediate element (14), so that the covering (13) and the intermediate element (14) can slide freely one with respect to the other, maintaining the covering (13) parallel to the base plate (15).
