Abstract (en)

A structure of decorative frame for flat sheet door having a cross section formed with a depressed central portion and two raised sides, and having connecting-sleeves and plug-tubes integrally formed on the back side and positioned symmetrically with respect to the longitudinal center line of the decorative frame of which the plug-tube functions as tenon and the connecting-sleeve functions as mortise, so that two identical decorative frames shall be joined together and securely installed on the flat sheet door simply by inserting the plug-tube into the corresponding connecting-sleeve from opposite side of the flat sheet door to form a complete decorative frame with three-dimensional decorative effect.
