Abstract (en)
[origin: WO03059112A1] The invention concerns a luminous and odoriferous jewel. Said jewel comprises an interchangeable sealed device (3) inserted in the jewel designed to emit and modulate a light flux. Said device comprises an exposed diode (5) controlled by an electronic circuit (6) powered by a button cell (7) enabling to obtain different colours fixed or moving or periodically emitted, programmed or remote-controlled. The upper wall (1') of the jewel is coated with a sealing varnish while the lower wall (1'') is porous and enables injection of a perfume with prolonged diffusion.
