Abstract (en)
[origin: WO2005002491A1] The invention relates to an encapsulated blister package, which is especially a medicine package containing tablets (8) or pills. The package has the flat outer casing (1), most preferably made of cardboard, and the inner part (2) partly extractable from it, the inner part comprising the disc (7) formed as a blister package mounted rotatably onto the base (5). The base has an outlet opening or similar so that the tablet that has been brought to the opening by rotating the disc, can be pressed out of the disc and removed from the package through the opening.
