Abstract (en)

[origin: WO2005009549A1] The invention relates to a transport device (10) for a plurality of golf clubs, which comprises a housing part and a handle (11), mounted on said housing part. Said housing part is embodied as a flat support (20), having recesses (22) for each golf club, which are open upwards and extend in the longitudinal direction. Said golf clubs can thus be housed on said support (20), adjacent to each other and separated from each other.
