Abstract (en)
[origin: WO2005009628A2] The invention relates to a delivery device (1) forming a handle (2), for in-situ PUR foam with two or more receiver mountings (8, 10) for a can, such as an in-situ PUR foam can and a can (11) of further substances (111) and at least one delivery tube (4), connected to the delivery device (1), whereby the substances (I, II) from at least two cans (9, 11) may be applied by the same delivery tube (4). The invention further relates to an embodiment with simplified manipulation, whereby the delivery device (1) comprises a switching element (14), for the alternating release of the at least two substances (I, II) through the one delivery tube (4).
