Abstract (en)

[origin: DE10332762A1] The vehicle seat (10) comprises a seat cushion part (2) which is movable relative to the seat base part (8) about a second axle (B) parallel to transverse direction (9). The cushion part can be moved from a cushion-utilizing-position to a cushion-loading-position. The backrest part (1) can also be rotatably moved, from an in-use position to a loading position, about a first axle (A) relative to seat base part. An independent claim is also included for the method of folding a vehicle seat.
