Abstract (en)

[origin: WO2005010271A1] The present invention relates to a method for the working of woven and non-woven fabrics, yarns, natural and polymeric fibres, and inorganic fibres and films, glass and alcantara. In particular, it relates to a method that permits the improvement of surface characteristics, and even the possibility of obtaining new surface characteristics. Said method comprises substrate surface processing with cold plasma, after or during appropriate and specific surface degassing action.
