Abstract (en)

[origin: WO2005012657A1] The aim of the invention is to provide a displacement device (183) for displacing a sealing element (120) that is used to seal an outflow opening (108, 110), in particular of a sink (100) or a washbasin, said displacement device being easily and reliably actuated and permitting a versatile configuration of the sink and the connections of the sink or washbasin. This is achieved by a displacement device (183) comprising an electric drive element (152).
