Abstract (en)
[origin: WO2005010296A1] The invention relates to laminate flooring (1) comprising an under-sided carrier plate (2) which has configurations (5, 6) for a groove/spring connection corresponding to at least one pair of opposite-lying edges, also comprising an upper-sided groove layer and wearing coat (4), on which the underside of a decorative layer is defined, said decorative layer (3) being provided between the carrier plate (2) and the groove layer and wearing coat (4). The laminate flooring comprises at least one recess which is oriented in a preferably parallel manner on a pair of opposite-lying edges and which extends on an upper side between two opposite lying edges in order to produce a laminate flooring whose floorboard measurements can be obtained according to the width and/or length of the laminate flooring and the decorative layer and the groove layer and wearing coat extend over the entire surface surrounding the recess(es).
