Abstract (en)

[origin: WO2005001692A2] The invention relates to a method, device and bus system for monitoring the distributed system composed of a number of nodes, which are connected by means of a bus system, whereby at least a number of nodes are provided as monitoring nodes, and process data of at least one monitored node are stored data areas of memory units of the bus system, to which the monitoring nodes have access, and the process data are evaluated by the monitoring nodes.
