Abstract (en)
The machine has a lever gear with a pair of connecting rods (37, 38) that are flexibly connected with a connection rod (35) at an eccentric shaft on one side and with pushing units by respective crank stilts (42, 43) on other side, where the pushing units have an adjusting unit (55). The stilts are flexibly held at an upper part (13) of a frame (11) in the area between the respective connecting rods and units by supporting rods (45, 46).
