Abstract (en)

Packaging for pharmaceutical products comprising a box-type structure (10) defining a first receptacle (134) suitable for containing pharmaceutical products such as blister strips of tablets or the like, the packaging further including a second receptacle (140) which can be stored in the first receptacle and which can be removed for use as a temporary receptacle for said pharmaceutical products. The second receptacle is preferably in the form of sleeve means for receiving a blister strip of tablets or the like.
