Abstract (en)

The device has a gear wheel (3) that is driven by a drive unit (6), where the gear wheel is supported in a housing (2). The housing comprises a retainer area for a rod shaped unit, where the housing and the gear wheel are arranged as two-parts. The two parts are connected by a radially arranged joint (4), and gear wheel parts (3a, 3b) are rotatable in an operating position for screwing the rod shaped unit.
