Abstract (en)

A disk launching toy (10) comprises a plurality of disks and a base (20) having a support surface and support means. It further comprises a disk launcher (30, 31, 32) supported above the support surface by the support means and launching a stream of the disks. Oscillation means coupled to the support means for oscillating the disk launcher (30, 31, 32) in a side-to-side pivotal motion cause the stream of disks to be sprayed in an angular pattern.
