Abstract (en)

[origin: FR2855062A1] The device has a harness including an auto-blocking reel (22) that automatically retrieves a strap (23). The strap has a free end including a snap hook that hooks the strap to a slide. A tubular rod (25) is displaced along a ladder between a lower part and an upper part of a ladder and is immobilized in the vicinity of the upper part of the ladder. The rod has two ends arranged for receiving two pins integrated to a vehicle.
