Abstract (en)
[origin: DE10333861B3] The flat, mat-like element to serve, in particular, as a screen against observation or as a decorative item comprises a carrier material in the form of threads or wires woven with one another, and a filler material clamped between the carrier material. Independent claims are also included for (a) a method for producing the proposed element; (b) an application of artificial plant garlands for production of the proposed element; (c) an application of the proposed element for production of mats, hedges, curtains and carpets.
