Abstract (en)  
[origin: WO2005012074A1] The invention relates to a device, especially a sports device for surfing or similar, comprising a base body (2) which is made of a foam material and which comprises at least one laminate coating (4) made of a woven material and a ballast material. The inventive device is characterized by an intermediate layer (6) arranged between the base body (2) and the laminate coating (4). The invention also relates to methods for the production of fiber composite materials linked to foam materials.
