Abstract (en)  
[origin: FR2857341A1] The head has a body (1) defining a distribution channel (13) having an axial inlet opened towards a base and a lateral outlet opening on an outer peripheral surface. An outer rim (2) defines a distribution orifice (23) and the body is mounted on the rim such that the outlet communicates with the orifice. The body defines a support surface (17) in contact with stoppers (26, 27) of the rim to axially insert the body in the rim.
