Abstract (en)
[origin: WO2005010275A2] The invention relates to a method for the production of a fibre web, in particular, a SC-A or SC-B paper web, from a fibre suspension provided by a headbox, whereby the fibre web is then introduced into a forming unit, in particular, a pressing section, a drying section, a calander, in particular, an on-line calander and a roller. A raw material is used which at least partly comprises DIP (deinked paper) and/or similar materials. A corresponding device for production of the fibre web is also disclosed.
