Abstract (en)
[origin: WO2005012661A1] The invention relates to a surface de-watering device, especially a catch pit (1), which is connected to a de-watering channel or to a similar water guiding element. At least one wall section (10) connecting the water guiding element is provided. According to the invention, the wall section (10) comprises at least one flat section (20) which is made of an elastomer material enabling adaptation to be carried out using simple tools.
