Abstract (en)  
[origin: WO2005015006A1] The invention relates to a method for starting the engine (5) of a vehicle (1), whereby it is ensured that a stationary vehicle cannot be moved unintentionally during the starting process. When the vehicle is to be started, it is checked to see if it is stationary, and if the vehicle (1) is stationary, at least one vehicle brake (10) is activated. Once the vehicle brake (10) has been activated, the engine (5) can be started.
