Abstract (en)
The support (2) has a frame including two spaced hooks (6) for clipping the frame on a crosspiece (30) arranged on a vacuum cleaner (20). The frame has, in its front part, an open space for housing a rigid belt (12). The space is delimited by four vertical upper and lower retainer fingers (8, 10). The fingers (8) are sufficiently spaced from the fingers (10) for folding and unfolding the belt. An independent claim is also included for a vacuum cleaner having a frame comprising a crosspiece receiving a vacuum cleaner support.
