Abstract (en)

There is provided a carton 11 having a pair of first side panels 18 and a pair of second side panels 19. The first side panels 18 are attached to a rear panel 17 and the second side panels 19 are attached to a front panel 15. Locking tabs 26 extend from the second side panels 19 and are received in arcuate slots provided by the first side panels 18. This enables the rear panel 17 and first side panels 18 to rotate thereby increasing the access area at the top of the carton. Top closure means 20, 22, 23 are also provided.
