Abstract (en)
  [origin: EP1652784A1] A load platform, especially intended for transporting barrels of circular plan, comprising a upper load surface (5) provided with a series of recesses (6) of circular contour which reproduce the resting surface of the base of said barrels, and in that the length of the sides of the load surface (5) is a multiple of the length of the sides of the base of crates for transporting beverage bottles. Ribs (13) defining lateral supports or stops against the sliding of said crates project from the load surface (5) in a position parallel and adjacent to its edges.
