Abstract (en)
[origin: WO2004096591A2] The invention concerns a vehicle folding top. Said top comprises at least one rear central top element (5), one intermediate central top element (6), one front central top element (7), one left rear lateral top element (8), one left front lateral top element (9), one right rear lateral top element, and one right front lateral top element. The rear central top element is articulated on the vehicle body about a first transverse pin (11). The intermediate central top element is articulated on the vehicle body about a second transverse pin (18) and the front central top element is mounted on the intermediate central top element.
