Abstract (en)

[origin: EP1655195A2] The device has a memory provided for a private internet home page and attached at each rail vehicle. The memory of the rail vehicle is connected with a terminal by a control bus for reading a home page, where the control bus is a wire or radio circuit. The terminal consists of Graphical-User-Interface and a display device for acquiring data. An independent claim is also included for a method for displaying of data of rail vehicle on a terminal of the vehicle or a control station.
