Abstract (en)

[origin: EP1655443A2] Automatic device for the spatula-coating of sealant on the internal part of the face of the glass sheet (1M) of the insulating glass pane (3) having a protrusion in respect to the other glass sheet or the other glass sheets. Such device consists of a lateral extension of the known extrusion nozzle (101), such extension incorporating a duct with an extrusion slit (107) that can be partialized in its length in order to adapt to the protrusion of the bigger glass sheet.
