Abstract (en)
The valve has a pin arranged in a recess of a valve body (4) and comprising a closure body (14) seated on a valve seat in a closed position. The body (14) is designed such that a gap (19) is formed between the bodies. The angle and length of the gap are formed such that the breadth of the gap is as large as a surface finish of the valve body or the closure body in the position, where the breadth amounts to maximum of 10 micrometer.
