Abstract (en)

[origin: FR2875956A1] The connector has a core made of conductive material section and forming U-cages (C1, C2), an auxiliary block (316) and a base plate (31). Traversing orifices provided in the blocks delimit secondary cable conductor reception housings (103, 104), and a passage (316g) immobilizes a rotation of a female screw forming a temporary branching receptacle on the connector. The base plate connects the U-cages and the auxiliary blocks. An independent claim is also included for a connection box comprising a false cut type cut-off grid including a set of connectors.
