Abstract (en)

[origin: WO2005016719A1] One aspect of the invention relates to a building or component kit intended for constructing different variations of vehicles. The kit comprises a number of connecting members as well as unique modules; for example, wheel modules, which comprises a carrier (6) with means (17) for holding a wheel or some other kind of running member (7), as well as a number of sockets (12, 13) for receiving connecting members (4), in which sockets said connecting members can be disengageably applied. Another aspect of the invention relates to the wheel module as such.
