Abstract (en)
[origin: WO2006021826A1] Articulated container and/or bottle holder for refrigerating compartments, comprising at least a mobile board (3) with respect to a base (2; 2'), where at least in one operating configuration said board (3) is resting stably through first fastening means (4, 5; 10). According to the invention, the board (3) comprises a plurality of articulated elements (3A, 3P) fitted with both second means (6) for their mutual articulation and third means (7, 8) for a steady housing of said containers and/or bottles in a space above said base (2; 2'), for their optimal, efficient, functional and versatile location inside the refrigerating compartments.
