Abstract (en)

[origin: EP1656852A1] The holder has a thin plate, made of thermoformed material, with a base side (5) and a housing (6) to receive a cosmetic product. The housing with a height (d) has an opening (7) provided in the base side. The plate has a network of projections (10) which extend from the side (5), on the same side as the housing. The projections have a height equal to the height (d) to permit the distribution of effort of pressure exerted on the side (5). An independent claim is also included for a print media assembly.
