Abstract (en)

Device comprises generator (4) including an internal energy source and covered with the housing unit. The microprocessor (6) is freely programmed with respect to the recording parameters and the applications like temperature, applied pressure, dripping trials, dose and time data. A force/pressure generator (11) has a flexible foil pressure gauge (12), which is fastened to the side panel (16). Device comprises generator (4) including an internal energy source and covered with the housing unit. The microprocessor (6) is freely programmed with respect to the recording parameters and the applications like temperature, applied pressure, dripping trials, dose and time data. A force/pressure generator (11) has a flexible foil pressure gauge (12), which is fastened to the side panel (16). Mounting agent with a foil, which covers the housing and the container. The housing (3) exhibits a solvable cover (14) and an opening for a plug/connector. The generator exhibits a data interface (15) for the selection of stored data on the microprocessor and for wireless transmission at an external reporting device and/or PC. ACTIVITY : Ophthalmological. MECHANISM OF ACTION : None given.
