Abstract (en)  
[origin: EP1657164A1] The package has a body part (12), and side parts fastened at the body part. The body part is manufactured from a plane, rectangular or quadratic plate part, and folding lines of the side parts limits three sections. The lines are directed from each outer section side to a longitudinal wall. An adjacent section at the wall form a base part. Each side part has a side wall, base plate fixed at the base part and side plates. An independent claim is also included for a method for manufacturing the package.
