Abstract (en)

Device for safeguarding a blister strip (B) and enabling a tablet or the like to be dispensed from a respective housing on the blister strip, which is retained and protected within the device, this latter being formed from a single sheet of cardboard folded about the blister strip, the blisters of which extend through holes (4) provided in a part of the sheet, in the other part of which there being provided breakable knurlings defining removable discs (6) which are aligned with said holes to enable said discs to break with consequent detachment of said discs and expulsion of said tablets when the individual blisters of the blister strip are pressed with the finger of one hand.
