Abstract (en)
[origin: EP1657366A2] The in wall sanitary fixture has a connection body, which connects to a cold water supply and to a warm water supply. A functional unit has a housing for a sanitary valve and connects to the water supply. The connection is fastened to the functional unit. The connector is provided so that the functional unit is linearly moveable for insertion into the connection body. An unblocking mechanism (30, 32) is provided, with which the connection between functional unit (3) and connection body (2) is provided.
