Abstract (en)
A shower cubicle (1), comprising a shower tray (2), a compartment (7) which can be opened for user access, and internally at least one keypad unit (13) for controlling and setting the operating cycle of the shower cubicle. The keypad unit (13) comprises a keypad (15), which is normally deactivated even when the shower cubicle is operating, is controlled by at least one device (21), which can be operated selectively by the user, for activating temporarily the keypad and simultaneously suspending the operating cycle of the shower cubicle.
