Abstract (en)
Stabilizing accessories (1) which, in principle, adapting the measurements and shapes of some elements which comprise them, are applicable to portable ladders (2), whether a single ladder or a stepladder, with one or more climbing sections, and which increase the lateral stability thereof and permit them to be positioned according to different forms adapting to the requirements of each situation. The stabilizing accessories (1) comprise a connector (5) which is fixed to the outer face of the side beam (3) of the portable ladder (2) and an elbow (13) joined at one end to the connector (5) and at the opposite end to a support element (14), which acts as a support on the ground.
