Abstract (en)
[origin: WO2005019641A1] The invention relates to a fuel-injection valve (1) for fuel-injection systems of internal combustion engines. Said valve comprises a solenoid (2) and an armature (7) that can be excited by the solenoid (2) and that co-operates with a valve closing body (11), the latter forming a sealed seat with a valve seat body (12) that is located in a valve sleeve (5). The valve seat body (12) is fixed in the valve sleeve (5) by means of a clamping collar (23).
