Abstract (en)  
[origin: WO2006018331A1] The invention relates to a printer (2) and a printer (2) control method for printing a report on data recorded by a tachograph (1), wherein the printer (2) is provided with the stock (9) of a printing medium (10) and a device (15) for transporting said printing medium. Conventional printers (2) frequently have a printing medium (10) stoppage, for example in cases of the printing medium adhesion to a printing cylinder (8) under effect of variations in temperature and air humidity. Said invention provides with a solution wherein, the printing medium is transported in a neutral state at periodically repeated time spaces even in the absence of a printing job.
