Abstract (en)

[origin: WO2005020533A1] The invention relates to a system and a method for automated generation of access-controlled, personalized data and/or programs, wherein a user (10,...14) accesses a central unit (40) by means of a communications device (20,...24) via a network (30/31) and the access-controlled data and/or programs are transmitted to the communications device (10,...14), wherein data records (421,...423)) having data elements classified according to authorization categories (4211,...4214) are generated and wherein the personalized access-controlled data and/or programs are generated by means of a filter module (41) of the central unit (40) based on the authorization categories of the user (10,...14) and access request data of the user (10,...14).
