Abstract (en)
[origin: EP1658785A1] The return system for a drawer comprises a spring-loaded slide (2, 4) with a transverse pin (42) which moves in a guide (10) in a rail (1). This carries a forked section (44) which cooperates with a second slide (60). The spring-loaded slide moves into a curved section (12) at the end of the guide and releases the second slide, allowing the drawer to be pulled back.
