Abstract (en)
[origin: EP1659240A2] The device has an actuator with a contact unit and arranged at an area of a door blade. The contact unit is accommodated in an intermediate position of the blade, such that the blade is fixed with a sensor unit for controlling the actuator, if a door drive (10) is operated to open and close the door. The sensor unit is arranged in a socket outlet adapter (20), which is connected with an electrical power supply line of the drive.
